

Evidence-Based Medicine

Contents

Purpose and Procedure	194
Additional Articles Abstracted in <i>ACP Journal Club</i>	195
EBM NOTEBOOK	
Transferring evidence from research into practice: 1. The role of clinical care research evidence in clinical decisions	196
On the need for evidence-based psychiatry	199
THERAPEUTICS	
Review: SSRIs are as effective as tricyclics and have fewer side effects, but their cost-effectiveness has not been established	201
Moclobemide was an effective antidepressant in elderly patients with cognitive decline and depression	202
Informed consent decreased patient interest in prostate-specific antigen screening	203
Zinc lozenges reduced the duration of common cold symptoms	204
Intranasal ipratropium bromide reduced rhinorrhea and improved cold symptoms	205
Meta-analysis: Addition of chemotherapy to tamoxifen does not extend quality-adjusted survival in postmeno- pausal breast cancer	206
D ₂ resection led to higher mortality and morbidity than D ₁ resection for gastric cancer	207
A single dose of ceftriaxone reduced the incidence of wound and nosocomial infections after surgery for closed fractures	208
Meta-analysis: Shouldice technique is superior to the Bassini or McVay methods of hernia repair	209
Normothermia during colorectal resection reduced surgical-wound infection and length of hospital stay	210
Bupivacaine-norepinephrine was effective and safe during laceration repair in children	211
Carvedilol reduced mortality and hospitalization in chronic heart failure	212
Ardeparin plus graduated compression stockings prevented DVT after knee surgery	213
Fish oil reduced relapse and maintained remission in Crohn disease	214
Famciclovir reduced lesion healing time in recurrent genital herpes	215
Lamivudine plus zidovudine was an effective initial therapy for HIV-1 infection	216
Lamivudine plus zidovudine was more effective than continued zidovudine monotherapy for HIV-1 infection ..	217
Meta-analysis: Antibiotics at the time of a therapeutic abortion protect against upper genital tract infections ...	218
Greater access to primary care increased both patient satisfaction and hospital readmissions	219
ETIOLOGY	
Meta-analysis: Use of combined oral contraceptives in the past 10 years is associated with an increased risk for breast cancer	220
ECONOMICS	
Simvastatin reduced the costs of coronary heart disease	221
Physician extenders were more cost-effective than usual health care in men with hypercholesterolemia	222
Cost-effectiveness of cholesterol lowering varied greatly by cardiovascular risk	223
Consensus double reading of mammograms was more effective and less costly than single reading	224
