

## CORRECTIONS

In a recent commentary by Geerts (1), the first sentence of the second paragraph should read: "Only 1% of patients had recurrent thromboembolic events while receiving anticoagulants; and only 1% of patients who were anticoagulated for 6 months had major bleeding."

### Reference

1. Geerts WH. Commentary on "Fewer venous thromboembolism recurrences occurred with 6 months than with 6 weeks of

anticoagulant therapy." Evidence-Based Medicine. 1996 Jan-Feb;1:42. Comment on: Schulman S, Rhedin AS, Lindmarker P, et al., and the Duration of Anticoagulation Trial Study Group. A comparison of six weeks with six months of oral anticoagulant therapy after a first episode of venous thromboembolism. N Engl J Med. 1995; 332:1661-5.

In a recent commentary by Anderson (1), the second sentence of the second paragraph should read: "Streptokinase

at  $1.5 \times 10^6$  units may be more dangerous than rt-PA at 0.9 mg/kg."

### Reference

1. Anderson DC. Commentary on "Streptokinase led to higher 10-day and 6-month case fatality rates in acute stroke." Evidence-Based Medicine. 1996 May-June;1:108. Comment on: Multicentre Acute Stroke Trial-Italy (MAST-I) Group. Randomised controlled trial of streptokinase, aspirin, and combination of both in treatment of acute ischaemic stroke. Lancet. 1995;346:1509-14.
