

# Evidence-Based Medicine

## Contents

### Editorial

- 131** Developing future leaders in evidence-based medicine: the inaugural David Sackett Fellowship

### EBM analysis

- 133** **General medicine**  
Publication by association: how the COVID-19 pandemic has shown relationships between authors and editorial board members in the field of infectious diseases
- 137** NICE rapid guidelines: exploring political influence on guidelines
- 141** 'Diagnostic downshift': clinical and system consequences of extrapolating secondary care testing tactics to primary care

### Patient voices

- 149** **General medicine**  
Getting the COVID-19 vaccine as a transplant patient

### EBM opinion and debate

- 151** When we move cancer drugs from the second or third to the first line of treatment: what lessons can we learn from KEYNOTE-177 and JAVELIN-100
- 153** **OPEN ACCESS**  
Patient-reported outcome measures (PROMs) as proof of treatment efficacy
- 156** Misleading clinical evidence and systematic reviews on ivermectin for COVID-19

## June 2022 Volume 27 Issue 3

- 159** Can shared decision making address COVID-19 vaccine hesitancy?

### Original research

- 162** Face-to-face versus online clinically integrated EBM teaching in an undergraduate medical school: a pilot study

### Evidence synthesis

- 169** **OPEN ACCESS**  
Characteristics, quality and volume of the first 5 months of the COVID-19 evidence synthesis infodemic: a meta-research study

### Primary care

- 178** **OPEN ACCESS**  
Combination fixed-dose  $\beta$  agonist and steroid inhaler as required for adults or children with mild asthma: a Cochrane systematic review

### Letters

- 185** COVID-19 information in news media: room for greater transparency
- 187** **OPEN ACCESS**  
Evidence on the efficacy of ivermectin for COVID-19: another story of apples and oranges
- 189** Quality appraisal of evidence generated during a crisis: in defence of 'timeliness' and 'clarity' as criteria
