<i>Evidence-Based Nursing</i> : an introduction	37
Using <i>Best Evidence</i> in clinical practice	39
Correction	40

THERAPEUTICS

Review: Lowering cholesterol levels with statin drugs reduces fatal and nonfatal strokes and total mortality	41
Stroke unit care improved survival and function for 5 years after an acute stroke	42
Enoxaparin reduced combined coronary events in unstable angina and non-Q-wave MI at 14 and 30 days	43
Coronary angioplasty led to more nonfatal MIs than medical therapy in patients with coronary artery disease ..	44
Low-molecular-weight heparin and unfractionated heparin were equally effective for acute pulmonary embolism	45
Indinavir plus zidovudine and lamivudine reduced HIV RNA levels in most HIV-infected persons with previous antiretroviral treatment	46
Indinavir plus zidovudine and lamivudine reduced the progression to AIDS in patients with previous zidovudine therapy	47
Antiseptic catheters reduced catheter-related infections and were well tolerated	48
A catheter coated with minocycline and rifampin reduced bloodstream infections	49
Review: Intensive insulin therapy for type 1 diabetes mellitus increases risk for severe hypoglycemia, and pump therapy increases ketoacidosis	50
Review: Noninvasive positive-pressure ventilation reduces mortality and need for intubation in the intensive care unit	51

Review: Antibiotics reduce the already low complication rate and shorten the duration of symptoms in sore throat at day 3 but not day 7	52
Prescribing antibiotics for sore throat increased reattendance	53
Review: High-compression bandages, stockings, and Unna's boot improve healing rates in venous leg ulcers ...	54
Review: Plasma-derived hepatitis B vaccine is safe and effective for health care workers	55
Calcium supplements during normal pregnancy did not prevent pre-eclampsia or other related disorders	56
Calcium and vitamin D reduced nonvertebral fractures and bone loss	57

PROGNOSIS

Bleeding occurred in one fifth of recognised pregnancies before the twentieth week and over half of these miscarried	58
--	----

ETIOLOGY

Childhood acute lymphoblastic leukaemia was not linked to magnetic-field exposure from power lines	59
Pregnancy after breast cancer treatment was not associated with an increased risk for death	60
ACE inhibitor use was associated with severe hypoglycemia in patients with diabetes mellitus	61

QUALITY IMPROVEMENT

Review: Provision of costing information changes physician behaviour and reduces costs	62
Feedback to general practitioners increased prescribing of aspirin to patients with ischaemic heart disease	63

ECONOMICS

Loss-of-life cost for paediatric illness associated with parental smoking was estimated at U.S. \$8.2 billion per year	64
