

Evidence-Based Medicine

Contents

Purpose and Procedure	130	Inactivated influenza vaccine decreased pulmonary function in asthma except when colds were considered ..	148
Additional Articles Abstracted in ACP Journal Club	132	Fluticasone reduced the severity of exacerbations in patients with COPD	149
EBM NOTEBOOK		A nonprescription combination analgesic alleviated migraine headaches	150
Evidence-based medicine and cost-effectiveness: uneasy bedfellows?	133	High-dose riboflavin reduced the frequency of migraine headaches	151
Evidence-based paediatrics	134	Review: Heterocyclic antidepressants and rational psychological therapies reduce depression in older ambulatory patients	152
THERAPEUTICS		An educational session on tardive dyskinesia increased patients' knowledge at 6 months without affecting compliance or clinical stability	153
Review: Prophylactic antiepileptic drugs reduce early seizure after head injury but not death or neurological disability	137	Written and verbal advice from general practitioners led to an increase in self-reported physical activity for sedentary patients	154
Review: Calcium antagonists reduce death and dependence in subarachnoid hemorrhage	138	Donepezil improved cognitive and global function in mild-to-moderate Alzheimer disease	155
Review: Prophylactic antibiotics reduce mortality in critically ill adults	139	DIAGNOSIS	
Addition of intensive follow-up procedures to standard follow-up did not improve survival in patients with colorectal cancer	140	Genotype testing improved the clinical diagnosis of Alzheimer disease	156
Botulinum toxin promoted healing and symptomatic relief of chronic anal fissure	141	Review: A prediction guide that includes clinical assessment and noninvasive tests is accurate for diagnosing deep venous thrombosis	157
Review: 5-aminosalicylic acid induces remission in ulcerative colitis	142	Review: Noninvasive tests are useful only for symptomatic deep venous thrombosis	158
Review: 5-aminosalicylic acid maintains remission in ulcerative colitis	143	PROGNOSIS	
Thrombolysis had benefit similar to that of surgery for acute arterial leg occlusion but had more hemorrhagic complications	144	15 years of follow-up of nonaffective functional psychotic disorders showed a high risk for relapse, suicide, and chronicity	159
Review: Low-dose, short-term corticosteroids reduce joint tenderness and pain in adults who have rheumatoid arthritis	145	ETIOLOGY	
Review: Heparin and mechanical devices reduce deep venous thrombosis in elderly patients having surgery for hip fracture	146	High homocysteine levels were associated with increased CHD in men	160
Review: Improved glycaemic control reduces microvascular complications in type 2 diabetes mellitus ..	147	Glossary	Inside back cover
