

Evidence-Based Medicine

Contents

Purpose and Procedure	98	Falsified information did not change the conclusions of NSABP B-06 supporting lumpectomy plus radiation therapy for breast cancer	117
Additional Articles Abstracted in ACP Journal Club	100	Different local therapies for early breast cancer do not affect overall survival	118
EBM NOTEBOOK		Shouldice hernia repair had a lower recurrence rate than Bassini or Cooper ligament (McVay) repair	119
Evidence-based purchasing	101	Subcutaneous heparin plus pneumatic compression stockings prevented pulmonary embolism after cardiac surgery	120
Use of confidence intervals to indicate uncertainty in research findings	102	Family intervention reduces relapse rates, rehospitalisation, and costs and increases compliance with medication in schizophrenia	121
THERAPEUTICS		DIAGNOSIS	
Antihypertensive drugs decrease mortality, coronary events, and stroke in elderly persons	105	Duplex Doppler ultrasonography was accurate in determining 60% or greater carotid artery stenosis	122
Tissue plasminogen activator improved clinical outcome after acute ischemic stroke	106	Pulse oximetry and the WHO algorithm were appropriate for identifying acute lower respiratory tract infection in Peruvian children	123
Low-molecular-weight heparin was effective in reducing poor outcome at 6 months in ischemic stroke	107	PROGNOSIS	
Streptokinase led to higher 10-day and 6-month case fatality rates in acute stroke	108	High vitamin A intake in early pregnancy was associated with birth defects	124
Quadruple therapy eradicated <i>H. pylori</i> -associated peptic ulcer disease better than dual therapy	109	ETIOLOGY	
Triple therapy eradicated <i>H. pylori</i> infection better than dual therapy	110	Higher diastolic blood pressure but not total cholesterol level increases the risk for fatal stroke, particularly in middle age ..	125
Multiple insulin injection therapy delayed microvascular complications in NIDDM	111	Nonfatal venous thromboembolism was associated with oral contraceptives that contain desogestrel and gestodene	126
Home visiting programmes reduce childhood injury	112	QUALITY IMPROVEMENT	
Pertussis-toxoid vaccine was effective and safe	113	Practice guidelines improved reporting of patient variables ..	127
Intensive diabetes therapy did not affect neuropsychological functioning	114	ECONOMICS	
Postprandial blood glucose monitoring improved glycaemic control and neonatal outcomes in women with gestational diabetes	115	Warfarin was cost-effective for stroke prophylaxis in nonvalvular atrial fibrillation with additional risk factors ..	128
Cisplatin-based chemotherapy has a small survival benefit in locally advanced and advanced non-small cell lung cancer ..	116	GLOSSARY	Inside back cover
