Contents

Purpose and procedure	161	Safety of a D-dimer based strategy and repeated ultrasonography did not differ in DVT and normal proximal vein ultrasonography	179
EBM notebook		Epidermal lidocaine safely reduced pain in children having venipuncture at the antecubital fossa	180
Jottings...	162	Fatty acid supplements did not improve motor function but improved literacy levels in developmental coordination disorder	181
How should clinicians interpret results reflecting the effect of an intervention on composite end points: should I dump this lump?	162		
Bubbling grape juice	164		
Evidently...	167		
Therapeutics		Diagnosis	
Radical prostatectomy reduced death and progression more than watchful waiting in early prostate cancer	168	Third and fourth heart sounds had low sensitivity but moderate to high specificity for predicting left ventricular dysfunction	182
Review: chemotherapy and hormonal therapy reduce recurrence and mortality at 15 years in early breast cancer	169	Neurological examination identified 61% of patients with focal cerebral hemisphere lesions but without obvious focal signs	183
Amlodipine or lisinopril was not better than chlorthalidone for reducing CVD risk in hypertensive black or non-black patients	170		
Screening and active management reduced perinatal complications more than routine care in gestational diabetes	171	Aetiology	
A lifestyle intervention or metformin prevented or delayed the onset of metabolic syndrome in persons at risk	172	Perinatal environmental factors and parental psychopathology were associated with risk of autism in Danish children	184
Review: group-based education in self management strategies improves outcomes in type 2 diabetes mellitus	173		
Review: α glucosidase inhibitors improve glycaemic control but have uncertain effects on patient-important outcomes in type 2 diabetes	174	Economics	
Review: treatment with ventilation tubes has little effect in children with otitis media with effusion	175	Review: prompt endoscopy is not a cost effective strategy for initial management of dyspepsia	185
Review: tiotropium reduces exacerbations and hospital admissions in COPD and improves quality of life	176		
A varicella-zoster virus vaccine reduced the burden of illness of herpes zoster in older adults	177	Clinical prediction guide	
A multidimensional non-drug intervention reduced daytime sleep in nursing home residents with sleep problems	178	A web-based clinical prediction tool predicted 10 year survival in breast cancer	186
		An algorithm comprising 7 baseline variables predicted the 2 year work disability status in non-specific back pain	187
		Additional articles abstracted in ACP Journal Club	188
		Resource review	189
		Other articles noted	191
