### Purpose and procedure

129

### EBM notebook

- 130 Jottings
- 130 "Pragmatic" clinical trials: from whose perspective?
- 132 Writing a research article that is "fit for purpose": EQUATOR Network and reporting guidelines
- 134 45-year-old male from an RTA with isolated sternal fracture: immediate discharge or hospital admission?

### Therapeutics

- 136 Review: diabetes is not a coronary disease equivalent
- 137 Screening for CAD in asymptomatic patients with type 2 diabetes did not reduce risk of cardiac events
- 138 Review: bariatric surgery reduces weight and improves type 2 diabetes in adults
- 139 Adding metformin to insulin did not improve a composite of microvascular and macrovascular disease in type 2 diabetes
- 140 Oral anticoagulant therapy safely prevented stroke in older patients with atrial fibrillation
- 141 Review: antenatal magnesium sulphate prevents cerebral palsy in preterm infants
- 142 Review: combining 2 classes of blood pressure-lowering drugs has an approximately additive effect on systolic blood pressure
- 143 Review: continuous positive airway pressure devices are effective and cost-effective for obstructive sleep apnoea
- 144 Review: nicotine replacement therapy as assisted "reduction-to-stop" reduces smoking and sustains abstinence in smokers
- 145 Blood pressure-lowering did not improve short-term mortality or dependency in acute stroke and hypertension
- 146 A stepped-care prevention programme decreased depression and anxiety disorders in elderly patients

- 147 Review: differences in efficacy and acceptability exist for 12 new-generation antidepressants for major depression
- 148 Manuka honey improved wound healing in patients with sloughy venous leg ulcers
- 149 Review: oral vitamin D prevents non-vertebral and hip fractures in a dose-dependent manner in patients  $\geq 65$  years of age

### Diagnosis

- 150 Self-administered vaginal swabs were accurate for screening for sexually transmitted infections in the emergency department

### Aetiology

- 151 Higher red blood cell distribution width was associated with increased risk of mortality in adults  $\geq 45$  years of age
- 152 BMI  $< 22.5$  and  $> 25$  predicted higher overall mortality in adults
- 153 Fetal exposure to valproate was associated with lower IQ scores at 3 years of age than exposure to other antiepileptic drugs
- 154 Concomitant use of proton pump inhibitors with clopidogrel may increase risk of readmission after discharge for acute MI

### Clinical prediction guide

- 155 A dipstick clinical prediction rule modestly improved diagnostic precision in women with suspected urinary tract infection

### Resource reviews

156

### Additional articles abstracted in ACP Journal Club

158

### Other articles noted

159

### Glossary
