

Evidence-Based Medicine

Contents

June 2019 Volume 24 Issue 3

Editorial

- 85** Introducing the EBM Verdict: research evidence relevant to clinical practice

EBM opinion and debate

Maternal and child health

- 87** Utilising social media to educate and inform healthcare professionals, policy-makers and the broader community in evidence-based healthcare

- 90** More than 2 billion pairs of eyeballs: Why aren't you sharing medical knowledge on Wikipedia?

EBM Learning

General medicine

- 92** Inclusion and exclusion criteria and the problem of describing homogeneity of study populations in clinical trials

EBM analysis

- 95** Assessing function of electronic health records for real-world data generation

Mental health

- 99** Updated 2018 NICE guideline on pharmacological treatments for people with ADHD: a critical look

Original EBM Research

- 103** Evidence-based practice education for healthcare professions: an expert view

Research methods and reporting

Primary care

- 109** Causal inference for clinicians

Commentaries

General medicine

- 113** Increased risk of mortality with liberal oxygen therapy compared with conservative oxygen therapy in critically ill adults

- 114** Twenty-four-hour ambulatory systolic blood pressure may be a better predictor of all-cause and cardiovascular mortality than clinic blood pressure

- 115** Optimal anticoagulant treatment of cancer-associated venous thromboembolism remains unclear

- 116** MRI and MRI-targeted biopsy take precedence over systematic biopsy in primary prostate cancer diagnosis

Primary care

- 117** Consuming 100 g/week or less of alcohol was associated with the lowest risk of all-cause mortality

- 119** Broad-spectrum antibiotics gave no clinical benefit and more adverse effects than narrow-spectrum antibiotics in treating acute respiratory tract infections in US children

Letter

- 121** Righteous indignation versus misplaced frustration: p values, CIs, effect sizes and the CASTLE-AF trial
