

Evidence-Based Medicine

Contents

Editorial

- 37** Coroners' concerns to prevent harms: a series of coroners' case reports to serve patient safety and educate the public, clinicians and policy-makers

EBM opinion and debate

- 39** On reporting and interpreting statistical significance and p values in medical research

OPEN ACCESS

EBM learning

General medicine

- 43** Dealing with categorical risk data when extracting data for meta-analysis

EBM analysis

Primary care

- 46** Reducing overuse by recognising the unintended harms of good intentions

Original research

- 49** Efficacy of reminders for increasing volunteer engagement in translating Cochrane plain language summaries: a pilot randomised controlled trial

Surgery

- 51** Evaluation of the completeness of intervention reporting in Cochrane surgical systematic reviews using the TIDieR-SR checklist: a cross-sectional study

April 2021 Volume 26 Issue 2

Research methods and reporting

Primary care

- 53** Challenges in interpreting results from 'multiple regression' when there is interaction between covariates

Evidence synthesis

Primary care

- 57** Effectiveness of honey for symptomatic relief in upper respiratory tract infections: a systematic review and meta-analysis

Coroners' concerns to prevent harms

- 65** Alcohol-based hand sanitisers: a warning to mitigate future poisonings and deaths

EBM verdict

Maternal and child health

- 69** Does ursodeoxycholic acid have a role in the treatment of women with intrahepatic (obstetric) cholestasis of pregnancy anymore?

General medicine

- 71** How to reduce diagnostic error: 'neutral zone' approach
