

# Evidence-Based Medicine

## Contents

### Editorial

- 73** **General medicine**  
Partnering with patients in the production of evidence

### EBM opinion and debate

- 77** **Primary care**  
Digital health interventions and inequalities: the case for a new paradigm
- 79** Forgotten Primodos story and the roles of general practitioners
- 82** Building capacity in evidence-based medicine in low-income and middle-income countries: problems and potential solutions

### EBM learning

- 85** Combining and converting groups when extracting data for meta-analysis
- 88** **Primary care**  
Summarising good practice guidelines for data extraction for systematic reviews and meta-analysis

### EBM analysis

- 91** **General medicine**  
Intervention reporting of clinical trials published in high-impact cardiology journals: effect of the TIDieR checklist and guide
- 98** **Primary care**  
Are CAR-T therapies living up to their hype? A study using real-world data in two cohorts to determine how well they are actually working in practice compared with bone marrow transplants
- 103** **Surgery**  
Big data registries in spine surgery research: the lurking dangers

### Original research

- 106** **General medicine**  
Items for consideration in a reporting guideline for mediation analyses: a Delphi study
- 107** **Emergency care**  
Biomarkers and outcomes of COVID-19 hospitalisations: systematic review and meta-analysis
- 109** **Mental health**  
Blinding in randomised clinical trials of psychological interventions: a retrospective study of published trial reports

## June 2021 Volume 26 Issue 3

### Emergency care

- 110** Blinding practices during acute point-of-care ultrasound research: the BLIND-US meta-research study

### Primary care

- 112** Analysis of reports of unintended pregnancies associated with the combined use of non-enzyme-inducing antibiotics and hormonal contraceptives

### Evidence synthesis

#### Maternal and child health

- 114** Maternal caffeine consumption and pregnancy outcomes: a narrative review with implications for advice to mothers and mothers-to-be

#### Surgery

- 116** Heterogeneity of outcomes for intraoperative music interventions: a scoping review and evidence map

### Research methods and reporting

- 118** Claims of 'no difference' or 'no effect' in Cochrane and other systematic reviews
- 121** Assessment of assumptions of statistical analysis methods in randomised clinical trials: the what and how

#### General medicine

- 127** Considerations on the strengths and limitations of using disease-related mortality as an outcome in clinical research

### Coroners' concerns to prevent harms

- 131** Emollients and smoking: a fire hazard that could be prevented to reduce future deaths

### EBM verdict

- 135** When is the right time to induce labour?

#### Primary care

- 137** Short course penicillin for treating patients with pharyngotonsillitis

### Letters

- 139** Spinning wider
- 140** Does the PROSPERO registration prevent double review on the same topic?
