Subject Index

A

Abortion
Bleeding occurred in one fifth of recognised pregnancies before the twentieth week, and over half of these miscarried, 58

Accidental falls
Review: Multiple risk factor modification reduces falls in elderly persons, 80

Acetaminophen
A nonprescription combination analgesic alleviated migraine headaches, 150

Aciclovir
Oral aciclovir shortened duration of symptoms in herpetic gingivostomatitis, 16

Acquired immunodeficiency syndrome
HIV-1 RNA levels and CD4+ cell counts predicted disease progression in HIV infection, 23
Ritonavir reduced AIDS complications and risk for death in HIV-1 infection, 186

Administration, cutaneous
8-hour transdermal nicotine patch use and hourly smoking in pregnant women produced similar nicotine concentrations, 91

Adolescence
Fluoxetine decreased depressive symptoms in children and adolescents with nonpsychotic major depressive disorder, 105
Nebulised ipratropium combined with albuterol led to improved pulmonary function in children with severe asthma (Letter), 103

Adrenal cortex hormones
Use of inhaled corticosteroids was associated with the development of cataracts, 24

Adrenergic β-antagonists
Review: Corticosteroids reduce relapse rate, β-agonist use, and hospitalisation rate in acute asthma exacerbation after initial assessment, 9
Review: Diuretics are more efficacious than β-blockers as first-line therapy for elderly patients with hypertension, 174

Aged
A 6-point risk score predicted which elderly patients would fall in hospital, 96
Calcium and vitamin D reduced nonvertebral fractures and bone loss, 57
Donepezil was safe and effective in Alzheimer disease, 179
Genotype testing improved the clinical diagnosis of Alzheimer disease, 156
Greater duration of customary physical activity increased survival in older persons, 90
Review: Diuretics are more efficacious than β-blockers as first-line therapy for elderly patients with hypertension, 174
Review: Few depressed elderly inpatients improve, 124
Review: Heterocyclic antidepressants and rational psychological therapies reduce depression in older ambulatory patients, 152
Review: Multiple risk factor modification reduces falls in elderly persons, 80
Review: Screening may not improve vision in older persons, 192

Review: Tacrine has some benefits and many adverse effects in Alzheimer disease, 178
Some lifestyle and dietary habits were associated with all-cause and coronary heart disease mortality in elderly persons, 125

Albuminuria
Review: Microalbuminuria predicts overall mortality and cardiovascular mortality and morbidity in non-insulin-dependent diabetes mellitus, 27

Albuterol
Combining nebulised ipratropium and albuterol improved FEV₁ but did not improve symptoms or quality of life in COPD, 120

Alcohol drinking
Alcohol consumption was not associated with cognitive performance or brain atrophy in older Australian men, 26
Review: Benzodiazepines are more effective than neuroleptics in reducing delirium and seizures in alcohol withdrawal, 11

Alcohol withdrawal delirium
Review: Benzodiazepines are more effective than neuroleptics in reducing delirium and seizures in alcohol withdrawal, 11

Alendronate
Alendronate reduced new fractures in postmenopausal women who had low bone-mineral density and existing vertebral fractures, 119

Alternative medicine
Evidence-based medicine and complementary medicine (EBM Note), 168

Alzheimer disease
Donepezil improved cognitive and global function in mild-to-moderate Alzheimer disease, 155
Donepezil was safe and effective in Alzheimer disease, 179
Genotype testing improved the clinical diagnosis of Alzheimer disease, 156
Ginkgo biloba safely and modestly improved dementia, 81
Review: Tacrine has some benefits and many adverse effects in Alzheimer disease, 178

Aminosalicylic acids
Review: 5-aminosalicylic acid induces remission in ulcerative colitis, 142
Review: 5-aminosalicylic acid maintains remission in ulcerative colitis, 143

Amiodarone
Review: Amiodarone reduces all-cause mortality in patients at risk for sudden cardiac death, 113
Review: Amiodarone reduces mortality after MI and for congestive heart failure, 112

Amniotomy
Early amniotomy increased the rate of fetal heart decelerations, 18

Anastomosis, surgical
Omentoplasty did not prevent anastomotic leakage after colonic or rectal resection, 189

Angina pectoris
Enoxaparin reduced combined coronary events in unstable angina and non-Q-wave MI at 14 and 30 days, 43
Review: Medical therapy, angioplasty, and bypass surgery are effective for stable angina in patients at different risk levels, 187
Angina, unstable
Serial ECGs were more sensitive than an initial ECG for diagnosing chest pain, 123
Tirofiban plus heparin was more effective than heparin alone for unstable angina and non-Q-wave MI, 176
Angioplasty
Vein or polytetrafluoroethylene patch closure after carotid endarterectomy reduced stroke and recurrent stenosis, 188
Angioplasty, transluminal, percutaneous coronary
Coronary angioplasty led to more nonfatal MIs than medical therapy in patients with coronary artery disease, 44
Review: Early angioplasty improves outcomes for patients with myocardial infarction, 83
Review: Medical therapy, angioplasty, and bypass surgery are effective for stable angina in patients at different risk levels, 187
Angiotensin-converting enzyme inhibitors
ACE inhibitor use was associated with severe hypoglycemia in patients with diabetes mellitus, 61
Review: Survival benefit for early ACE inhibitor therapy is greater in some subgroups of patients with acute MI, 175
Ankle injuries
Use of Ottawa ankle rules reduced radiography requests for patients who had acute ankle or midfoot injuries, 31
Antibiotic prophylaxis
Review: Prophylactic antibiotics reduce mortality in critically ill adults, 139
Antibiotics
Prescribing antibiotics for Sore throat increased readmission, 53
Review: Antibiotics do not resolve acute cough, 183
Review: Antibiotics provide modest benefit for acute otitis media, 14
Review: Antibiotics reduce the already low complication rate and shorten the duration of symptoms in sore throat at day 3 but not day 7, 52
Anticholesteremic agents
Lovastatin reduced coronary events in healthy persons with low HDL cholesterol levels, 172
Anticoagulants
Enoxaparin had lower costs than unfractionated heparin for acute coronary syndrome, 193
Warfarin plus aspirin prevented ischemic heart disease in high-risk men, 114
Anticonvulsants
Review: Prophylactic antiepileptic drugs reduce early seizure after head injury but not death or neurological disability, 137
Treatment after first seizure did not increase seizure remission periods in patients with a first tonic-clonic seizure, 118
Antidepressive agents
Review: Few depressed elderly inpatients improve, 124
Review: Heterocyclic antidepressants and rational psychological therapies reduce depression in older ambulatory patients, 152
Antidepressive agents, tricyclic
Review: Selective serotonin reuptake inhibitors differ from tricyclic antidepressants in adverse events, 86
Selective serotonin reuptake inhibitors were less cost-effective for initial treatment than tricyclic antidepressants, 87
Antihypertensive agents
Low-dose aspirin reduced the risk for cardiovascular events in treated hypertension, 173
Review: Diuretics are more efficacious than β-blockers as first-line therapy for elderly patients with hypertension, 174
Anti-inflammatory agents
Review: Low-dose, short-term corticosteroids reduce joint tenderness and pain in adults who have rheumatoid arthritis, 145
Anti-inflammatory agents, nonsteroidal
Review: Topical nonsteroidal anti-inflammatory drugs are effective and safe for pain, 108
Antipsychotic agents
An educational session on tardive dyskinesia increased patients' knowledge at 6 months without affecting compliance or clinical stability, 153
Apolipoproteins E
Genotype testing improved the clinical diagnosis of Alzheimer disease, 156
Arterial occlusive diseases
Thrombolysis had benefit similar to that of surgery for acute arterial leg occlusion but had more hemorrhagic complications, 144
Asthma
Inactivated influenza vaccine decreased pulmonary function in asthmatics except when colds were considered, 148
Nebulised ipratropium combined with albuterol led to improved pulmonary function in children with severe asthma (Letter), 105
Asthma
Low-dose aspirin reduced the risk for cardiovascular events in treated hypertension, 173
Review: Diuretics are more efficacious than β-blockers as first-line therapy for elderly patients with hypertension, 174
Arthritis, rheumatoid
Review: Low-dose, short-term corticosteroids reduce joint tenderness and pain in adults who have rheumatoid arthritis, 145
Asphyxia neonatorum
Delivery at night or during the summer was associated with increased risk for infant death related to an intrapartum event, 192
Asthma
A nonprescription combination analgesic alleviated migrane headaches, 150
Feedback to general practitioners increased prescribing of aspirin to patients with ischaemic heart disease, 63
Low-dose aspirin reduced the risk for cardiovascular events in treated hypertension, 173
Tirofiban plus heparin was more effective than heparin alone for unstable angina and non-Q-wave MI, 176
Anticoagulants
Aspirin
A nonprescription combination analgesic alleviated migrane headaches, 150
Feedback to general practitioners increased prescribing of aspirin to patients with ischaemic heart disease, 63
Low-dose aspirin reduced the risk for cardiovascular events in treated hypertension, 173
Tirofiban plus heparin was more effective than heparin alone for unstable angina and non-Q-wave MI, 176
Review: Corticosteroids reduce relapse rate, β-agonist use, and hospitalisation rate in acute asthma exacerbation after initial assessment, 9
Review: Limited asthma education reduces emergency department visits but does not improve patient outcomes, 121

Bacterial infections
Review: Prophylactic antifungal treatment decreases systemic fungal infection but not mortality in cancer complicated by neutropenia, 20

Bandages
Review: High-compression bandages, stockings, and Unna's boot improve healing rates in venous leg ulcers, 54

Beclometasone
Use of inhaled corticosteroids was associated with the development of cataracts, 24

Bed rest
Review: Advice to stay active is effective for acute low-back pain but bed rest is not, 109

Biochemistry
On the need for evidence-based clinical biochemistry (EBM Note), 7

Biopsy
Biopsy taken at orchidopexy was associated with an increased risk for testicular cancer in boys with cryptorchidism, 28

Bone density
Calcium and vitamin D reduced nonvertebral fractures and bone loss, 57

Botulinum toxin type A
Botulinum toxin promoted healing and symptomatic relief of chronic anal fissure, 141

Breast neoplasms
Extending screening mammography to include younger women minimally increased life expectancy with large increases in cost, 95
Pregnancy after breast cancer treatment was not associated with an increased risk for death, 60
Radiotherapy added to adjuvant chemotherapy reduced recurrence and improved survival in stages II and III breast cancer, 76
Radiotherapy added to adjuvant chemotherapy reduced recurrence rates in premenopausal women with node-positive breast cancer, 77
Review: Recent HRT increases the risk for breast cancer, 93

Bronchodilator agents
Combining nebulised ipratropium and albuterol improved FEV1, but did not improve symptoms or quality of life in COPD, 120

Calcium
Calcium and vitamin D reduced nonvertebral fractures and bone loss, 57
Calcium supplements during normal pregnancy did not prevent pre-eclampsia or other related disorders, 56
Calcium-channel blockers
Review: Calcium antagonists reduce death and dependence in subarachnoid hemorrhage, 138

Cardiovascular diseases
A model predicted the benefits of hyperlipidemia and hypertension therapy in high-risk primary prevention and secondary prevention, 194
Low-dose aspirin reduced the risk for cardiovascular events in treated hypertension, 173
Review: Microalbuminuria predicts overall mortality and cardiovascular mortality and morbidity in non-insulin-dependent diabetes mellitus, 27

Carotid stenosis
Vein or polytetrafluoroethylene patch closure after carotid endarterectomy reduced stroke and recurrent stenosis, 188

Cataract
Use of inhaled corticosteroids was associated with the development of cataracts, 24

Catheterization
Review: Heparin reduces central venous and pulmonary artery catheter clots, 111

Central venous catheterization
A catheter coated with minocycline and rifampin reduced bloodstream infections, 49
Antiseptic catheters reduced catheter-related infections and were well tolerated, 48

Cerebral aneurysm
Review: Calcium antagonists reduce death and dependence in subarachnoid hemorrhage, 138

Cerebrovascular disorders
Acute stroke unit care improved quality of life at 5 years, 185
Early discharge to community care was as effective as conventional care for stroke, 82
Review: HMG-CoA reductase inhibitors reduce stroke, CHD, and all-cause mortality, 115
Review: Lowering cholesterol levels with statin drugs reduces fatal and nonfatal strokes and total mortality, 41
Review: Statins prevent stroke, especially in patients with coronary heart disease, 10
Review: Stroke and death from carotid endarterectomy are predicted by 3 clinical and 3 angiographic factors, 92
Stroke unit care improved survival and function for 5 years after an acute stroke, 42

Cervical neoplasms
Deferred treatment of cervical abnormalities resulted in poor follow-up and delayed treatment of serious disease, 19

Cesarean section
Early amniotomy increased the rate of fetal heart decelerations, 18
Chemotherapy, adjuvant
Radiotherapy added to adjuvant chemotherapy reduced recurrence and improved survival in stages II and III breast cancer, 76

Caffeine
A nonprescription combination analgesic alleviated migraine headaches, 150
Radiotherapy added to adjuvant chemotherapy reduced recurrence rates in premenopausal women with node-positive breast cancer, 77

Child abuse
Home visits by nurses reduced child abuse and neglect, 74

Children
Didanosine alone or zidovudine plus didanosine was more effective than zidovudine alone for children with HIV infection, 15
Fluoxetine decreased depressive symptoms in children and adolescents with nonpsychotic major depressive disorder, 105
Nebulised ipratropium combined with albuterol led to improved pulmonary function in children with severe asthma (Letter), 103
Oral aciclovir shortened duration of symptoms in herpetic gingivostomatitis, 16

Chlorhexidine
Antiseptic catheters reduced catheter-related infections and were well tolerated, 48

Chlorpromazine
Review: Chlorpromazine reduces relapse and leads to greater global improvement but increases adverse events in schizophrenia, 171

Cholesterol
Lovastatin reduced coronary events in healthy persons with low HDL cholesterol levels, 172
Review: Lowering cholesterol levels with statin drugs reduces fatal and nonfatal strokes and total mortality, 41

Cholinesterase inhibitors
Donepezil was safe and effective in Alzheimer disease, 179

Citalopram
Review: Selective serotonin reuptake inhibitors are effective for mixed chronic pain, 12

Clinical competence
Review: Subtle clinical findings can detect left-sided heart failure in adults, 22

Cognition
Alcohol consumption was not associated with cognitive performance or brain atrophy in older Australian men, 26
Donepezil improved cognitive and global function in mild-to-moderate Alzheimer disease, 155
Donepezil was safe and effective in Alzheimer disease, 179
Ginkgo biloba safely and modestly improved dementia, 81
Review: Tacrine has some benefits and many adverse effects in Alzheimer disease, 178

Colectomy
Omentoplasty did not prevent anastomotic leakage after colonic or rectal resection, 189

Colitis, ulcerative
Review: 5-aminosalicylic acid induces remission in ulcerative colitis, 142
Review: 5-aminosalicylic acid maintains remission in ulcerative colitis, 143

Coloscopy
Addition of intensive follow-up procedures to standard follow-up did not improve survival in patients with colorectal cancer, 140

Colorectal neoplasms
Addition of intensive follow-up procedures to standard follow-up did not improve survival in patients with colorectal cancer, 140

Colposcopy
Deferred treatment of cervical abnormalities resulted in poor follow-up and delayed treatment of serious disease, 19

Common cold
Inactivated influenza vaccine decreased pulmonary function in asthma except when colds were considered, 148

Community health nursing
Home visits by nurses improved some maternal and child outcomes, 75
Home visits by nurses reduced child abuse and neglect, 74

Community health services
Early discharge to community care was as effective as conventional care for stroke, 82

Community-acquired infections
Review: Clinical assessment is inaccurate for diagnosing community-acquired pneumonia, 89

Coronary angiography
Conservative management was more effective than invasive management in acute non-Q-wave MI, 177

Coronary artery bypass
Review: Medical therapy, angioplasty, and bypass surgery are effective for stable angina in patients at different risk levels, 187

Coronary disease
A model predicted the benefits of hyperlipidemia and hypertension therapy in high-risk primary prevention and secondary prevention, 194
Coronary angioplasty led to more nonfatal MIs than medical therapy in patients with coronary artery disease, 44
Enoxaparin had lower costs than unfractionated heparin for acute coronary syndrome, 193
Lovastatin reduced coronary events in healthy persons with low HDL cholesterol levels, 172
Review: Statins prevent stroke, especially in patients with coronary heart disease, 10
Some lifestyle and dietary habits were associated with all-cause and coronary heart disease mortality in elderly persons, 125

Cost of illness
Loss-of-life cost for pediatric illness associated with parental smoking was estimated at U.S. $8.2 billion per year, 64

Cost-benefit analysis
A programme of methadone maintenance combined with moderate counselling services was cost-effective, 94
Evidence-based medicine and cost-effectiveness: uneasy bedfellows? (EBM Note), 133
Selective serotonin reuptake inhibitors were less cost-effective for initial treatment than tricyclic antidepressants, 87

Cost savings
Enoxaparin had lower costs than unfractionated heparin for acute coronary syndrome, 193
Evidence-Based Medicine November/December 1998 Subject Index 203

Review: Provision of costing information changes physician behaviour and reduces costs, 62

Costs and cost analysis
Loss-of-life cost for paediatric illness associated with parental smoking was estimated at U.S. $8.2 billion per year, 64

Cough
Review: Antibiotics do not resolve acute cough, 183

Counseling
A programme of methadone maintenance combined with moderate counselling services was cost-effective, 94
Review: Patient education and counseling increase preventive behaviors, 85

Critical care
Review: Prophylactic antibiotics reduce mortality in critically ill adults, 139

Cryptorchidism
Biopsy taken at orchidopexy was associated with an increased risk for testicular cancer in boys with cryptorchidism, 28

Deafness
Review: Antibiotics provide modest benefit for acute otitis media, 14

Decision trees
Review: A prediction guide that includes clinical assessment and noninvasive tests is accurate for diagnosing deep venous thrombosis, 157

Dementia
Ginkgo biloba safely and modestly improved dementia, 81

Depression
2 questions were as good as more questions for detecting depression, 21
Review: Heterocyclic antidepressants and rational psychological therapies reduce depression in older ambulatory patients, 152
Review: Selective serotonin reuptake inhibitors differ from tricyclic antidepressants in adverse events, 86
Selective serotonin reuptake inhibitors were less cost-effective for initial treatment than tricyclic antidepressants, 87

Depressive disorder
Fluoxetine decreased depressive symptoms in children and adolescents with nonpsychotic major depressive disorder, 105
Review: Few depressed elderly inpatients improve, 124

Desmethylazine
Review: Desmethylazine reduces hearing loss in childhood HIB meningitis and in pneumococcal meningitis when given early, 73

Diabetes mellitus
ACE inhibitor use was associated with severe hypoglycemia in patients with diabetes mellitus, 61
Review: Prompted follow-up by specialists and GPs produces similar outcomes for diabetes mellitus, 88

Diabetes mellitus, insulin-dependent
Review: Intensive insulin therapy for type 1 diabetes mellitus increases risk for severe hypoglycemia, and pump therapy increases ketoacidosis, 50

Diabetes mellitus, non-insulin-dependent
Antihypertensive therapy with nisoldipine resulted in more MIs than therapy with enalapril in type 2 diabetes mellitus, 191
Review: Improved glycaemic control reduces microvascular complications in type 2 diabetes mellitus, 147
Review: Microalbuminuria predicts overall mortality and cardiovascular mortality and morbidity in non-insulin-dependent diabetes mellitus, 27

Diabetic ketoacidosis
Review: Intensive insulin therapy for type 1 diabetes mellitus increases risk for severe hypoglycemia, and pump therapy increases ketoacidosis, 50

Diarrhea
Quadrivalent rotavirus vaccine reduced dehydrating diarrhoea in infants, 78
Zinc supplementation reduced diarrhoea in young, poor Guatemalan children, 13

Didanosine
Didanosine alone or zidovudine plus didanosine was more effective than zidovudine alone for children with HIV infection, 15

Diet
Some lifestyle and dietary habits were associated with all-cause and coronary heart disease mortality in elderly persons, 123

Donepezil
Donepezil improved cognitive and global function in mild-to-moderate Alzheimer disease, 155
Donepezil was safe and effective in Alzheimer disease, 179

Duodenal ulcer
Omeprazole healed ulcers and maintained remission better than ranitidine, 117
Omeprazole maintained remission from ulcers better than misoprostol, 116

Dysentery, bacillary
Single-dose vitamin A reduced the severity of shigellosis in Bangladeshi children, 180

Dyskinesia, drug-induced
An educational session on tardive dyskinesia increased patients' knowledge at 6 months without affecting compliance or clinical stability, 153

Education, continuing
Review: Effectiveness of local opinion leaders varies, 29
Education, medical, continuing
Evidence-based medicine on the wards: report from an evidence-based minion (EBM Note), 101
Review: Provision of costing information changes physician behaviour and reduces costs, 62

Electrocardiography
Serial ECGs were more sensitive than an initial ECG for diagnosing chest pain, 123
Electromagnetic fields
Childhood acute lymphoblastic leukaemia was not linked to magnetic-field exposure from power lines, 59
Emergency services, hospital
Benefit from thrombolysis in acute MI was predicted in the emergency department, 32
Serial ECGs were more sensitive than an initial ECG for diagnosing chest pain, 123
Enalapril
Antihypertensive therapy with nisoldipine resulted in more MIs than therapy with enalapril in type 2 diabetes mellitus, 191
Endarterectomy, carotid
Review: Stroke and death from carotid endarterectomy are predicted by 5 clinical and 3 angiographic factors, 92
Vein or polytetrafluoroethylene patch closure after carotid endarterectomy reduced stroke and recurrent stenosis, 188
Enoxaparin
Enoxaparin had lower costs than unfractionated heparin for acute coronary syndrome, 193
Enoxaparin reduced combined coronary events in unstable angina and non-Q-wave MI at 14 and 30 days, 43
Enzyme inhibitors
Finasteride reduced symptoms and need for surgery for benign prostatic hyperplasia, 107
Epilepsy, tonic-clonic
Treatment after first seizure did not increase seizure remission periods in patients with a first tonic-clonic seizure, 118
Estrogen replacement therapy
Postmenopausal hormone use was associated with decreased total mortality, 25
Review: Recent HRT increases the risk for breast cancer, 93
Evidence-based medicine
Applying the results of trials and systematic reviews to individual patients (EBM Note), 165
Ask, and ye shall retrieve (EBM Note), 100
Commentary on applying the results of trials and systematic reviews to individual patients (EBM Note), 167
Evidence-based medicine and complementary medicine (EBM Note), 168
Evidence-based medicine and cost-effectiveness: uneasy bedfellows? (EBM Note), 133
Evidence-based medicine on the wards: report from an evidence-based minion (EBM Note), 37
Evidence-based pediatrics (EBM Note), 134
On the need for evidence-based clinical biochemistry (EBM Note), 7
Using Best Evidence in clinical practice (EBM Note), 39
Exercise
Some lifestyle and dietary habits were associated with all-cause and coronary heart disease mortality in elderly persons, 125
Written and verbal advice from general practitioners led to an increase in self-reported physical activity for sedentary patients, 154
F
Falls
A 6-point risk score predicted which elderly patients would fall in hospital, 96
Family practice
A streptococcal antigen detection test had low sensitivity and high specificity for detecting group A β-haemolytic streptococcus, 190
Written and verbal advice from general practitioners led to an increase in self-reported physical activity for sedentary patients, 154
Feedback
Feedback to general practitioners increased prescribing of aspirin to patients with ischaemic heart disease, 63
Fetal death
Delivery at night or during the summer was associated with an increased risk for infant death related to an intrapartum event, 192
Fetal membranes
Early amniotomy increased the rate of fetal heart decelerations, 18
Fetal monitoring
Early amniotomy increased the rate of fetal heart decelerations, 18
Fever
Review: Antibiotics reduce the already low complication rate and shorten the duration of symptoms in sore throat at day 3 but not day 7, 52
Fibrinolytic agents
Tirofiban plus heparin was more effective than heparin alone for unstable angina and non-Q-wave MI, 176
Finasteride
Finasteride reduced symptoms and need for surgery for benign prostatic hyperplasia, 107
Fissure in ano
Botulinum toxin promoted healing and symptomatic relief of chronic anal fissure, 141
Fluconazole
Review: Prophylactic antifungal treatment decreases systemic fungal infection but not mortality in cancer complicated by neutropenia, 20
Fluoxetine
Fluoxetine decreased depressive symptoms in children and adolescents with nonpsychotic major depressive disorder, 105
Review: Selective serotonin reuptake inhibitors are effective for mixed chronic pain, 12
Fluticasone
Fluticasone reduced the severity of exacerbations in patients with COPD, 149
Fluvoxamine
Review: Selective serotonin reuptake inhibitors are effective for mixed chronic pain, 12
Foot injuries
Use of Ottawa ankle rules reduced radiography requests for patients who had acute ankle or midfoot injuries, 31
Forecasting

- Benefit from thrombolysis in acute MI was predicted in the emergency department, 32

Fractures

- Alendronate reduced new fractures in postmenopausal women who had low bone-mineral density and existing vertebral fractures, 119
- Calcium and vitamin D reduced nonvertebral fractures and bone loss, 57

G

Glucocorticoids

- Review: Corticosteroids reduce relapse rate, β-agonist use, and hospitalisation rate in acute asthma exacerbation after initial assessment, 9

Goserelin

- Radiotherapy plus goserelin improved 5-year survival in locally advanced prostate cancer, 79

Graves disease

- Radioiodine plus prednisone prevented development or progression of ophthalmopathy in patients with Graves hyperthyroidism, 84

Guatemala

- Zinc supplementation reduced diarrhoea in young, poor Guatemalan children, 13

H

Head injuries

- Review: Prophylactic antiepileptic drugs reduce early seizure after head injury but not death or neurological disability, 137

Headache

- Review: Antibiotics reduce the already low complication rate and shorten the duration of symptoms in sore throat at day 3 but not day 7, 52

Health personnel

- Review: Plasma-derived hepatitis B vaccine is safe and effective for health care workers, 55

Health promotion

- Written and verbal advice from general practitioners led to an increase in self-reported physical activity for sedentary patients, 154

Heart failure, congestive

- Review: Amiodarone reduces all-cause mortality in patients at risk for sudden cardiac death, 113
- Review: Amiodarone reduces mortality after MI and for congestive heart failure, 112

HELLP syndrome

- Calcium supplements during normal pregnancy did not prevent pre-eclampsia or other related disorders, 56

Hemorrhage

- Bleeding occurred in one fifth of recognised pregnancies before the twentieth week, and over half of these miscarried, 58

Heparin

- Enoxaparin had lower costs than unfractionated heparin for acute coronary syndrome, 193
- Review: Heparin and mechanical devices reduce deep venous thrombosis in elderly patients having surgery for hip fracture, 146
- Review: Heparin reduces central venous and pulmonary artery catheter clots, 111
- Tirofiban plus heparin was more effective than heparin alone for unstable angina and non-Q-wave MI, 176

Heparin, low-molecular-weight

- Enoxaparin reduced combined coronary events in unstable angina and non-Q-wave MI at 14 and 30 days, 43
- Low-molecular-weight heparin and unfractionated heparin were equally effective for acute pulmonary embolism, 45

Hepatitis B vaccines

- Review: Plasma-derived hepatitis B vaccine is safe and effective for health care workers, 55

Hip fractures

- Review: Heparin and mechanical devices reduce deep venous thrombosis in elderly patients having surgery for hip fracture, 146

HIV

- Didanosine alone or zidovudine plus didanosine was more effective than zidovudine alone for children with HIV infection, 15
- Indinavir plus zidovudine and lamivudine reduced HIV RNA levels in most HIV-infected persons with previous antiretroviral treatment, 46
- Indinavir plus zidovudine and lamivudine reduced the progression to AIDS in patients with previous zidovudine therapy, 47
- Ritonavir reduced AIDS complications and risk for death in HIV-1 infection, 186

HIV protease inhibitors

- Indinavir plus zidovudine and lamivudine reduced HIV RNA levels in most HIV-infected persons with previous antiretroviral treatment, 46
- Indinavir plus zidovudine and lamivudine reduced the progression to AIDS in patients with previous zidovudine therapy, 47

Home care services

- A home-based intervention reduced the frequency of hospital readmissions and out-of-hospital deaths after discharge, 122
- Review: Hospital-at-home care does not improve patient health outcomes, 181

Homocysteine

- High homocysteine levels were associated with increased CHD in men, 160

Hospital units

- Acute stroke unit care improved quality of life at 5 years, 185

Hospitalization

- A 6-point risk score predicted which elderly patients would fill in hospital, 96
A home-based intervention reduced the frequency of hospital readmissions and out-of-hospital deaths after discharge, 122
ACE inhibitor use was associated with severe hypoglycemia in patients with diabetes mellitus, 61
Review: Corticosteroids reduce relapse rate, β-agonist use, and hospitalisation rate in acute asthma exacerbation after initial assessment, 9
Stroke unit care improved survival and function for 5 years after an acute stroke, 42
Hydroxymethylglutaryl-CoA reductase inhibitors
Review: HMGCoA reductase inhibitors reduce stroke, CHD, and all-cause mortality, 115
Hypertension
Antihypertensive therapy with nisoldipine resulted in more MIs than therapy with enalapril in type 2 diabetes mellitus, 191
Calcium supplements during normal pregnancy did not prevent pre-eclampsia or other related disorders, 56
Low-dose aspirin reduced the risk for cardiovascular events in treated hypertension, 173
Review: Diuretics are more efficacious than β-blockers as first-line therapy for elderly patients with hypertension, 174
Hypoglycemia
ACE inhibitor use was associated with severe hypoglycemia in patients with diabetes mellitus, 61
Review: Intensive insulin therapy for type 1 diabetes mellitus increases risk for severe hypoglycemia, and pump therapy increases ketoacidosis, 50
Ipratropium
Combining nebulised ipratropium and albuterol improved FEV, but did not improve symptoms or quality of life in COPD, 120
Nebulised ipratropium combined with albuterol led to improved pulmonary function in children with severe asthma (Letter), 103
Itraconazole
Review: Prophylactic antifungal treatment decreases systemic fungal infection but not mortality in cancer complicated by neutropenia, 20
Ketoconazole
Review: Prophylactic antifungal treatment decreases systemic fungal infection but not mortality in cancer complicated by neutropenia, 20
Knowledge
Ask, and ye shall retrieve (EBM Note), 100
Labor
Early amniotomy increased the rate of fetal heart decelerations, 18
Leadership
Review: Effectiveness of local opinion leaders varies, 29
Leg ulcer
Review: High-compression bandages, stockings, and Unna's boot improve healing rates in venous leg ulcers, 54
Leukemia, lymphocytic, acute
Childhood acute lymphoblastic leukaemia was not linked to magnetic-field exposure from power lines, 59
Life expectancy
A model predicted the benefits of hyperlipidemia and hypertension therapy in high-risk primary prevention and secondary prevention, 194
Lovastatin
Lovastatin reduced coronary events in healthy persons with low HDL cholesterol levels, 172
Review: Statins prevent stroke, especially in patients with coronary heart disease, 10
Low back pain
Review: Advice to stay active is effective for acute low-back pain but bed rest is not, 109
Lung diseases
Prophylactic chest physiotherapy reduced pulmonary complications after major abdominal surgery, 106
Lung diseases, obstructive
Combining nebulised ipratropium and albuterol improved FEV, but did not improve symptoms or quality of life in COPD, 120
Fluticasone reduced the severity of exacerbations in patients with COPD, 149
Lung neoplasms
Review: Nonsmokers exposed to other people’s tobacco smoke have an increased risk for lung cancer, 126

M
Mammography
Extending screening mammography to include younger women minimally increased life expectancy with large increases in cost, 95
Manipulation, orthopedic
Injections cured synovial shoulder complaints and manipulation cured shoulder-girdle complaints, 17
Mass screening
Extending screening mammography to include younger women minimally increased life expectancy with large increases in cost, 95
Mastectomy
Radiotherapy added to adjuvant chemotherapy reduced recurrence and improved survival in stages II and III breast cancer, 76
Radiotherapy added to adjuvant chemotherapy reduced recurrence rates in premenopausal women with node-positive breast cancer, 77
Maternal welfare
Home visits by nurses improved some maternal and child outcomes, 75
Medical history taking
Review: Clinical assessment is inaccurate for diagnosing community-acquired pneumonia, 89
Meningitis, bacterial
Review: Dexamethasone reduces hearing loss in childhood Hib meningitis and in pneumococcal meningitis when given early, 73
Methadone
A programme of methadone maintenance combined with moderate counselling services was cost-effective, 94
Methimazole
Radioiodine plus prednisone prevented development or progression of ophthalmopathy in patients with Graves hyperthyroidism, 84
Miconazole
Review: Prophylactic antifungal treatment decreases systemic fungal infection but not mortality in cancer complicated by neutropenia, 20
Migraine
A nonprescription combination analgesic alleviated migraine headaches, 150
High-dose riboflavin reduced the frequency of migraine headaches, 151
Minocycline
A catheter coated with minocycline and rifampin reduced bloodstream infections, 49
Misoprostol
Omeprazole maintained remission from ulcers better than misoprostol, 116
Mortality
A home-based intervention reduced the frequency of hospital readmissions and out-of-hospital deaths after discharge, 122
Coronary angioplasty led to more nonfatal MIs than medical therapy in patients with coronary artery disease, 44
Enoxaparin reduced combined coronary events in unstable angina and non–Q-wave MI at 14 and 30 days, 43
HIV-1 RNA levels and CD4+ cell counts predicted disease progression in HIV infection, 23
Postmenopausal hormone use was associated with decreased total mortality, 25
Review: Amiodarone reduces all-cause mortality in patients at risk for sudden cardiac death, 113
Review: Amiodarone reduces mortality after MI and for congestive heart failure, 112
Review: Lowering cholesterol levels with statin drugs reduces fatal and nonfatal strokes and total mortality, 41
Review: Microalbuminuria predicts overall mortality and cardiovascular mortality and morbidity in non-insulin-dependent diabetes mellitus, 27
Review: Noninvasive positive-pressure ventilation reduces mortality and need for intubation in the intensive care unit, 51
Review: Stroke and death from carotid endarterectomy are predicted by 5 clinical and 3 angiographic factors, 92
Stroke unit care improved survival and function for 5 years after an acute stroke, 42
Myocardial infarction
Benefit from thrombolysis in acute MI was predicted in the emergency department, 32
Conservative management was more effective than invasive management in acute non–Q-wave MI, 177
Coronary angioplasty led to more nonfatal MIs than medical therapy in patients with coronary artery disease, 44
Enoxaparin reduced combined coronary events in unstable angina and non–Q-wave MI at 14 and 30 days, 43
High homocysteine levels were associated with increased CHD in men, 160
Review: Amiodarone reduces all-cause mortality in patients at risk for sudden cardiac death, 113
Review: Amiodarone reduces mortality after MI and for congestive heart failure, 112
Review: Early angioplasty improves outcomes for patients with myocardial infarction, 83
Review: Survival benefit for early ACE inhibitor therapy is greater in some subgroups of patients with acute MI, 175
Serial ECGs were more sensitive than an initial ECG for diagnosing chest pain, 123
Myocardial ischemia
Feedback to general practitioners increased prescribing of aspirin to patients with ischaemic heart disease, 63
Myocardial revascularization
Conservative management was more effective than invasive management in acute non-Q-wave MI, 177

Narcotic dependence
A programme of methadone maintenance combined with moderate counselling services was cost-effective, 94

Nebulizers and vaporizers
Fluticasone reduced the severity of exacerbations in patients with COPD, 149
Use of inhaled corticosteroids was associated with the development of cataracts, 24

Neutropenia
Review: Prophylactic antifungal treatment decreases systemic fungal infection but not mortality in cancer complicated by neutropenia, 20

Nicotine
8-hour transdermal nicotine patch use and hourly smoking in pregnant women produced similar nicotine concentrations, 91

Nisoldipine
Antihypertensive therapy with nisoldipine resulted in more MIs than therapy with enalapril in type 2 diabetes mellitus, 191

Nursing Study
Postmenopausal hormone use was associated with decreased total mortality, 25

Nursing
Evidence-Based Nursing: an introduction (EBM Note), 37

O

Occupational diseases, prevention and control
Review: Plasma-derived hepatitis B vaccine is safe and effective for health care workers, 55

Odds ratios
Odds ratios revisited (Letter), 71

Office visits
Prescribing antibiotics for sore throat increased readtendance, 53

Omentum
Omentoplasty did not prevent anastomotic leakage after colonic or rectal resection, 189

Omeprazole
Omeprazole healed ulcers and maintained remission better than ranitidine, 117
Omeprazole maintained remission from ulcers better than misoprostol, 116

Orchidectomy
Biopsy taken at orchidectomy was associated with an increased risk for testicular cancer in boys with cryptorchidism, 28

Osteoporosis, postmenopausal
Alendronate reduced new fractures in postmenopausal women who had low bone-mineral density and existing vertebral fractures, 119

Otitis media
Review: Antibiotics provide modest benefit for acute otitis media, 14

Ottawa ankle rules
Use of Ottawa ankle rules reduced radiography requests for patients who had acute ankle or midfoot injuries, 31

Outreach visits
Review: Educational outreach visits combined with additional interventions reduce inappropriate prescribing by physicians, 128

P

Pain
A nonprescription combination analgesic alleviated migraine headaches, 150
Continuing to engage in normal activities after neck-sprain injury led to fewer symptoms than did immobilisation and sick leave, 110
Injections cured synovial shoulder complaints and manipulation cured shoulder-girdle complaints, 17
Review: Antibiotics provide modest benefit for acute otitis media, 14
Review: Low-dose, short-term corticosteroids reduce joint tenderness and pain in adults who have rheumatoid arthritis, 145
Review: Selective serotonin reuptake inhibitors are effective for mixed chronic pain, 12
Review: Topical nonsteroidal anti-inflammatory drugs are effective and safe for pain, 108

Paroxetine
Review: Selective serotonin reuptake inhibitors are effective for mixed chronic pain, 12

Patient compliance
Written and verbal advice from general practitioners led to an increase in self-reported physical activity for sedentary patients, 154

Patient discharge
A home-based intervention reduced the frequency of hospital readmissions and out-of-hospital deaths after discharge, 122
Early discharge to community care was as effective as conventional care for stroke, 82

Patient education
An educational session on tardive dyskinesia increased patients' knowledge at 6 months without affecting compliance or clinical stability, 153
Review: Limited asthma education reduces emergency department visits but does not improve patient outcomes, 121
Review: Patient education and counseling increase preventive behaviors, 85

Patient readmission
A home-based intervention reduced the frequency of hospital readmissions and out-of-hospital deaths after discharge, 122

Peak expiratory flow rate
Inactivated influenza vaccine decreased pulmonary function in asthma except when colds were considered, 148

Pediatrics
Evidence-based pediatrics (EBM Note), 134
Penicillin V
Prescribing antibiotics for sore throat increased readtendance, 53
Penile erection
Sildenafil improved sexual function in erectile dysfunction, 184

Pharyngitis
A streptococcal antigen detection test had low sensitivity and high specificity for detecting group A β-haemolytic streptococcus, 190
Prescribing antibiotics for sore throat increased readtendance, 53
Review: Antibiotics reduce the already low complication rate and shorten the duration of symptoms in sore throat at day 3 but not day 7, 52
Phosphodiesterase inhibitors
Sildenafil improved sexual function in erectile dysfunction, 184

Physical examination
Review: A prediction guide that includes clinical assessment and noninvasive tests is accurate for diagnosing deep venous thrombosis, 157
Review: Clinical assessment is inaccurate for diagnosing community-acquired pneumonia, 89
Review: Subtle clinical findings can detect left-sided heart failure in adults, 22

Physical fitness
Greater duration of customary physical activity increased survival in older persons, 90

Physical therapy
Injections cured synovial shoulder complaints and manipulation cured shoulder-girdle complaints, 17
Prophylactic chest physiotherapy reduced pulmonary complications after major abdominal surgery, 106
Physician's practice patterns
Review: Educational outreach visits combined with additional interventions reduce inappropriate prescribing by physicians, 128
Review: Effectiveness of local opinion leaders varies, 29
Review: Provision of costing information changes physician behaviour and reduces costs, 62

Plant extracts
Ginkgo biloba safely and modestly improved dementia, 81
Platelet aggregation inhibitors
Warfarin plus aspirin prevented ischemic heart disease in high-risk men, 114

Plethysmography
Review: Noninvasive tests are useful only for symptomatic deep venous thrombosis, 158

Pneumonia
Review: Clinical assessment is inaccurate for diagnosing community-acquired pneumonia, 89

Postnatal care
Home visits by nurses improved some maternal and child outcomes, 75
Home visits by nurses reduced child abuse and neglect, 74

Postoperative complications
Prophylactic chest physiotherapy reduced pulmonary complications after major abdominal surgery, 106

Practice guideline
Review: Benzodiazepines are more effective than neuroleptics in reducing delirium and seizures in alcohol withdrawal, 11

Review: Clinical practice guidelines may not improve patient outcomes in primary care, 30
Pravastatin
Review: Statins prevent stroke, especially in patients with coronary heart disease, 10
Prednisolone
Review: Low-dose, short-term corticosteroids reduce joint tenderness and pain in adults who have rheumatoid arthritis, 145
Prednisone
Radioiodine plus prednisone prevented development or progression of ophthalmopathy in patients with Graves hyperthyroidism, 84

Pre-eclampsia
Calcium supplements during normal pregnancy did not prevent pre-eclampsia or other related disorders, 56

Pregnancy outcome
Bleeding occurred in one fifth of recognised pregnancies before the twentieth week, and over half of these miscarried, 58

Pregnancy
8-hour transdermal nicotine patch use and hourly smoking in pregnant women produced similar nicotine concentrations, 91
Calcium supplements during normal pregnancy did not prevent pre-eclampsia or other related disorders, 56
Pregnancy after breast cancer treatment was not associated with an increased risk for death, 60

Prenatal care
Home visits by nurses improved some maternal and child outcomes, 75
Home visits by nurses reduced child abuse and neglect, 74

Prescription fees
Review: Provision of costing information changes physician behaviour and reduces costs, 62

Prescriptions, non-drug
Written and verbal advice from general practitioners led to an increase in self-reported physical activity for sedentary patients, 154

Primary care
2 questions were as good as more questions for detecting depression, 21
Review: Clinical practice guidelines may not improve patient outcomes in primary care, 30
Review: Prompted follow-up by specialists and GPs produces similar outcomes for diabetes mellitus, 88

Primary prevention
A model predicted the benefits of hyperlipidemia and hypertension therapy in high-risk primary prevention and secondary prevention, 194
Review: Patient education and counseling increase preventive behaviors, 85

Probability
Clinical prediction guides (EBM Note), 5
On some clinically useful measures of the accuracy of diagnostic tests (EBM Note), 68

Prognosis
HIV-1 RNA levels and CD4+ cell counts predicted disease progression in HIV infection, 23
Prostatic hyperplasia
Finasteride reduced symptoms and need for surgery for benign prostatic hyperplasia, 107

Prostatic neoplasms
Radiotherapy plus goserelin improved 5-year survival in locally advanced prostate cancer, 79

Psychotherapy, rational-emotive
Review: Heterocyclic antidepressants and rational psychological therapies reduce depression in older ambulatory patients, 152

Psychotherapy disorders
An educational session on tardive dyskinesia increased patients' knowledge at 6 months without affecting compliance or clinical stability, 153

Pulmonary embolism
Low-molecular-weight heparin and unfractionated heparin were equally effective for acute pulmonary embolism, 45

Pulmonary function tests
Nebulised ipratropium combined with albuterol led to improved pulmonary function in children with severe asthma (Letter), 103

Quality of life
Acute stroke unit care improved quality of life at 5 years, 185

Questionnaires
2 questions were as good as more questions for detecting depression, 21

Radiography
Use of Ottawa ankle rules reduced radiography requests for patients who had acute ankle or midfoot injuries, 31

Radiography, thoracic
Addition of intensive follow-up procedures to standard follow-up did not improve survival in patients with colorectal cancer, 140

Radiodine therapy
Radiodine plus prednisone prevented development or progression of ophthalmopathy in patients with Graves hyperthyroidism, 84

Radiotherapy
Radiotherapy added to adjuvant chemotherapy reduced recurrence and improved survival in stages II and III breast cancer, 76

Radiotherapy added to adjuvant chemotherapy reduced recurrence rates in premenopausal women with node-positive breast cancer, 77

Radiotherapy plus goserelin improved 5-year survival in locally advanced prostate cancer, 79

Randomised Intervention Treatment of Angina (RITA-2)
Coronary angioplasty led to more nonfatal MIs than medical therapy in patients with coronary artery disease, 44

Ranitidine
Omeprazole healed ulcers and maintained remission better than ranitidine, 117

Reading
Evidence-based medicine on the wards: report from an evidence-based ministry (EBM Note), 101

Recurrence
15 years of follow-up of nonaffective functional psychotic disorders showed a high risk for relapse, suicide, and chronicity, 159

Review: Chlorpromazine reduces relapse and leads to greater global improvement but increases adverse events in schizophrenia, 171

Review: Corticosteroids reduce relapse rate, β-agonist use, and hospitalisation rate in acute asthma exacerbation after initial assessment, 9

Treatment after first seizure did not increase seizure remission periods in patients with a first tonic-clonic seizure, 118

Reference standards
On some clinically useful measures of the accuracy of diagnostic tests (EBM Note), 68

Rehabilitation
Early discharge to community care was as effective as conventional care for stroke, 82

Reminder systems
Review: Prompted follow-up by specialists and GPs produces similar outcomes for diabetes mellitus, 88

Remission induction
Review: 5-aminosalicylic acid induces remission in ulcerative colitis, 142

Review: 5-aminosalicylic acid maintains remission in ulcerative colitis, 143

Respiratory insufficiency
Review: Noninvasive positive-pressure ventilation reduces mortality and need for intubation in the intensive care unit, 51

Respiratory tract infections
Review: Prophylactic antibiotics reduce mortality in critically ill adults, 139

Riboflavin
High-dose riboflavin reduced the frequency of migraine headaches, 151

Rifampin
A catheter coated with minocycline and rifampin reduced bloodstream infections, 49

Risk assessment
Applying the results of trials and systematic reviews to individual patients (EBM Note), 165

Commentary on applying the results of trials and systematic reviews to individual patients (EBM Note), 167

Odds ratios revisited (Letter), 71

Ritonavir
Ritonavir reduced AIDS complications and risk for death in HIV-1 infection, 186

Rotavirus
Quadrivalent rotavirus vaccine reduced dehydrating diarrhoea in infants, 78
Rural health
Zinc supplementation reduced diarrhoea in young, poor Guatemalan children, 13

Schizophrenia
15 years of follow-up of nonaffective functional psychotic disorders showed a high risk for relapse, suicide, and chronicity, 159
Review: Chlorpromazine reduces relapse and leads to greater global improvement but increases adverse events in schizophrenia, 171

Seizures
Review: Benzodiazepines are more effective than neuroleptics in reducing delirium and seizures in alcohol withdrawal, 11
Review: Prophylactic antiepileptic drugs reduce early seizure after head injury but not death or neurological disability, 137
Treatment after first seizure did not increase seizure remission periods in patients with a first tonic-clonic seizure, 118

Sensitivity and specificity
On some clinically useful measures of the accuracy of diagnostic tests (EBM Note), 68
On the need for evidence-based clinical biochemistry (EBM Note), 7

Septicemia
A catheter coated with minocycline and rifampin reduced bloodstream infections, 49
Antiseptic catheters reduced catheter-related infections and were well tolerated, 48

Serotonin uptake inhibitors
Review: Selective serotonin reuptake inhibitors differ from tricyclic antidepressants in adverse events, 86
Review: Selective serotonin reuptake inhibitors are effective for mixed chronic pain, 12
Selective serotonin reuptake inhibitors were less cost-effective for initial treatment than tricyclic antidepressants, 87

Sexual dysfunction
Sildenafil improved sexual function in erectile dysfunction, 184

Shigella
Single-dose vitamin A reduced the severity of shigellosis in Bangladeshi children, 180

Shoulder
Injections cured synovial shoulder complaints and manipulation cured shoulder-girdle complaints, 17

Silver sulfadiazine
Antiseptic catheters reduced catheter-related infections and were well tolerated, 48

Smoking
8-hour transdermal nicotine patch use and hourly smoking in pregnant women produced similar nicotine concentrations, 91

Loss-of-life cost for paediatric illness associated with parental smoking was estimated at U.S. $8.2 billion per year, 64
Review: Maternal smoking is associated with an increased risk for SIDS, 127
Review: Nonsmokers exposed to other people’s tobacco smoke have an increased risk for lung cancer, 126

Stomach ulcer
Omeprazole healed ulcers and maintained remission better than ranitidine, 117
Omeprazole maintained remission from ulcers better than misoprostol, 116

Stomatitis, herpetic
Oral acyclovir shortened duration of symptoms in herpetic gingivostomatitis, 16

Streptococcal infections
A streptococcal antigen detection test had low sensitivity and high specificity for detecting group A β-haemolytic streptococcus, 190

Stroke unit
Stroke unit care improved survival and function for 5 years after an acute stroke, 42

Subarachnoid hemorrhage
Review: Calcium antagonists reduce death and dependence in subarachnoid hemorrhage, 138

Sudden infant death
Review: Maternal smoking is associated with an increased risk for SIDS, 127

Sulfasalazine
Review: 5-aminosalicylic acid induces remission in ulcerative colitis, 142
Review: 5-aminosalicylic acid maintains remission in ulcerative colitis, 143

Survival rate
Conservative management was more effective than invasive management in acute non-Q-wave MI, 177
Greater duration of customary physical activity increased survival in older persons, 90
Radiotherapy plus goserelin improved 5-year survival in locally advanced prostate cancer, 79
Review: Survival benefit for early ACE inhibitor therapy is greater in some subgroups of patients with acute MI, 175

Tacrine
Review: Tacrine has some benefits and many adverse effects in Alzheimer disease, 178

Testicular neoplasms
Biopsy taken at orchidopexy was associated with an increased risk for testicular cancer in boys with cryptorchidism, 28

Thromboembolism
Low-molecular-weight heparin and unfractionated heparin were equally effective for acute pulmonary embolism, 45
Thrombolytic therapy
Benefit from thrombolysis in acute MI was predicted in the emergency department, 32
Review: Early angioplasty improves outcomes for patients with myocardial infarction, 83
Thrombolysis had benefit similar to that of surgery for acute arterial leg occlusion but had more hemorrhagic complications, 144

Thrombophlebitis
Clinical prediction guides (EBM Note), 5
Review: A prediction guide that includes clinical assessment and noninvasive tests is accurate for diagnosing deep venous thrombosis, 157
Review: Heparin and mechanical devices reduce deep venous thrombosis in elderly patients having surgery for hip fracture, 146
Review: Noninvasive tests are useful only for symptomatic deep venous thrombosis, 158

Thrombosis
Review: Heparin reduces central venous and pulmonary artery catheter clots, 111
Warfarin plus aspirin prevented ischemic heart disease in high-risk men, 114

Tobacco smoke pollution
Loss-of-life cost for paediatric illness associated with parental smoking was estimated at U.S. $8.2 billion per year, 64
Review: Maternal smoking is associated with an increased risk for SIDS, 127
Review: Nonsmokers exposed to other people’s tobacco smoke have an increased risk for lung cancer, 126

Tomography, X-ray computed
Addition of intensive follow-up procedures to standard follow-up did not improve survival in patients with colorectal cancer, 140

Triamcinolone
Injections cured synovial shoulder complaints and manipulation cured shoulder-girdle complaints, 17

Ultrasonography
Review: Noninvasive tests are useful only for symptomatic deep venous thrombosis, 158

Urokinase
Thrombolysis had benefit similar to that of surgery for acute arterial leg occlusion but had more hemorrhagic complications, 144

Vaginal smears
Deferred treatment of cervical abnormalities resulted in poor follow-up and delayed treatment of serious disease, 19

Ventilators, mechanical
Review: Noninvasive positive-pressure ventilation reduces mortality and need for intubation in the intensive care unit, 51

Ventricular dysfunction
Review: Subtle clinical findings can detect left-sided heart failure in adults, 22

Veterans
Alcohol consumption was not associated with cognitive performance or brain atrophy in older Australian men, 26

Viral load
HIV-1 RNA levels and CD4+ cell counts predicted disease progression in HIV infection, 23

Viral vaccines
Quadrivalent rotavirus vaccine reduced dehydrating diarrhoea in infants, 78

Vision disorders
Review: Screening may not improve vision in older persons, 182

Vision screening
Review: Screening may not improve vision in older persons, 182

Vitamin A
Single-dose vitamin A reduced the severity of shigellosis in Bangladeshi children, 180

Vitamin D
Calcium and vitamin D reduced nonvertebral fractures and bone loss, 57

Whiplash injuries
Continuing to engage in normal activities after neck-sprain injury led to fewer symptoms than did immobilisation and sick leave, 110

Wound healing
Review: High-compression bandages, stockings, and Unna’s boot improve healing rates in venous leg ulcers, 54

Zidovudine
Didanosine alone or zidovudine plus didanosine was more effective than zidovudine alone for children with HIV infection, 15
Indinavir plus zidovudine and lamivudine reduced HIV RNA levels in most HIV-infected persons with previous antiretroviral treatment, 46
Indinavir plus zidovudine and lamivudine reduced the progression to AIDS in patients with previous zidovudine therapy, 47

Zinc
Zinc supplementation reduced diarrhoea in young, poor Guatemalan children, 13
