

Evidence-Based Medicine

Contents

Purpose and Procedure	2
Additional Articles Abstracted in <i>ACP Journal Club</i>	3
EBM NOTEBOOK	
Using evidence to resolve clinical controversies: Is aggressive antihypertensive therapy harmful?	4
On the need for evidence-based surgery	6
THERAPEUTICS	
Venipuncture was less painful and more efficient than heel lancing for blood tests in newborn infants	9
Intensive blood glucose control reduced type 2 diabetes mellitus-related end points	10
Metformin reduced diabetes mellitus-related end points and all-cause mortality in overweight patients with type 2 diabetes	11
Tight blood pressure control reduced diabetes mellitus- related deaths and complications and was cost-effective in type 2 diabetes	12
Review: Antibiotics have no effect on diarrhea and increase bacteriologic relapse in salmonella intestinal infection	14
Review: Self-management education for adults with asthma improves health outcomes	15
Estrogen plus progestin was not effective for secondary prevention of coronary heart disease in postmenopausal women	16
Review: Fecal occult blood test screening reduces colorectal cancer mortality	17
The levonorgestrel intrauterine system avoided hysterectomy in women with excessive uterine bleeding ..	18
Review: Albumin does not reduce death in critically ill patients with hypovolemia, burns, or hypoalbuminemia ..	19
Review: Cognitive therapy is beneficial and equivalent to behaviour therapy and antidepressants for mild-to- moderate depression	20
Autologous bone-marrow transplantation after intensive chemotherapy was effective for acute myeloid leukaemia ...	21
Enoxaparin reduced venous thromboembolism after elective neurosurgery	22
Early outcomes of laparoscopic and tension-free inguinal hernia repair were similar and superior to Shouldice repair	23
DIAGNOSIS	
Review: Physical examination predicts the presence and distribution of peripheral vascular disease	24
PROGNOSIS	
Extremely premature infants born in 1990 to 1994 had higher survival and disability rates than those born in 1984 to 1989	25
Review: Individual variables have low power to predict recidivism among sex offenders	26
ETIOLOGY	
Higher volumes of hospital and surgeon paediatric cardiac surgical procedures were associated with lower mortality rates	27
Older drivers with reduced ability to process rapidly presented visual stimuli were more likely to have motor-vehicle crashes	28
Chorioamnionitis increased neonatal morbidity in very-low-birthweight infants	29
ECONOMICS	
Cardioversion followed by aspirin alone or with amiodarone was cost-effective for nonvalvular atrial fibrillation	30
QUALITY IMPROVEMENT	
Participation in an interactive seminar improved paediatricians' patient teaching and communication skills ..	31
CLINICAL PREDICTION GUIDE	
A 5-point scoring system predicted bleeding in patients treated with warfarin	32
