Evidence-Based Medicine

Contents

Purpose and procedure .................................................. 162

Additional articles abstracted in ACP Journal Club .................... 163

EBM notebook
A new arrival: evidence about differential diagnosis ............. 164

Resource corner .......................................................... 166

Therapeutics
Review: twice daily dosing of penicillin V is as effective as more frequent dosing for streptococcal tonsillitis .............. 168
Tiotropium improved lung function more than ipratropium in chronic obstructive pulmonary disease ................... 169
Weight loss in obese patients with asthma improved lung function and health status ........................................ 170
Angioplasty was no better than medication for reducing blood pressure or slowing disease progression in renal artery stenosis ............................................................... 171
Doxazosin was associated with more stroke and cardiovascular disease events than chlorthalidone in high risk hypertension ......................................................... 172
Review: brief primary care interventions are moderately effective for increasing physical activity .......................... 173
Review: aspirin lowers the risk for MI but not for stroke in people who do not have established vascular disease ....... 174
Hormone replacement therapy was associated with increased venous thromboembolism and deep venous thrombosis ................................................................. 175
Adding 3 dose artesunate to pyrimethamine sulfadoxine reduced treatment failure in children with acute uncomplicated malaria ......................................................... 176
Risk for mother to child HIV-1 infection was increased by breast feeding ............................................................. 177
Verapamil reduced attack frequency and the use of abortive agents in episodic cluster headache .................................. 178
Review: pharmacological interventions are more effective than non-pharmacological for attention deficit hyperactivity disorder ............................................................. 179
Methadone maintenance was more effective for treatment retention for opioid dependence than psychosocially enriched detoxification ......................................................... 180
Review: “distant healing” is often effective for improving patient outcomes ......................................................... 181
An advance directive programme in nursing homes reduced health services use without affecting patient satisfaction ........... 182
Pelvic floor re-education reduced incontinence at 1 year after radical prostatectomy ............................................. 183

Diagnosis
Neuropathic sensory symptoms did not accurately detect polyneuropathy in type 2 diabetes mellitus ...................... 184
A combination of tests done in general practice could assess the risk for left ventricular systolic dysfunction .................. 185
Review: papanicolaou and wet-mount smears have low sensitivity but high specificity for detecting vaginal trichomoniasis .......................................................... 186
Clinical examination could not accurately predict neonatal jaundice ................................................................. 187

Prognosis
The recurrence rate of venous thromboembolism after a first or second episode of deep venous thrombosis was high .... 188

Aetiology
Review: silicone breast implants do not increase the risk for connective tissue diseases ........................................ 189

Economics
Hospitalisation for more than 3 days after thrombolysis for uncomplicated myocardial infarction was not cost effective .... 190

Differential diagnosis
A simple algorithm improved physicians’ diagnostic performance for patients presenting with syncope ................. 191

Author index ............................................................... 192

Subject index ............................................................ 197
