

Evidence-Based Medicine

Editors: Brian Haynes & Paul Glasziou

Contents

Purpose and procedure	34	Multilayer bandaging plus compression hosiery for lymphedema of a limb	52
Additional articles abstracted in <i>ACP Journal Club</i>	35	Review: radiotherapy for breast cancer	53
EBM notebook: Of studies, syntheses, synopses, and systems: the "4S" evolution of services for finding current best evidence	36	Orlistat for weight loss and coronary risk reduction in obesity	54
Resource corner	39	Alendronate decreased vertebral fractures in men with osteoporosis	55
Therapeutics		Diagnosis	
Self management of oral anticoagulation v specialist clinic management	41	Review: retinal photography test for detecting diabetic retinopathy	56
Amiodarone v sotalol or placebo in atrial fibrillation	42	The Hopkins Verbal Learning Test for detecting mild dementia	57
Review: various interventions increase smoking cessation rates	43	Prognosis	
Review: intensive blood pressure control for hypertension and diabetes	44	Postherpetic neuralgia after a first episode of herpes zoster	58
Review: inhaled corticosteroids v oral corticosteroids for acute asthma	45	Aetiology	
Zinc acetate lozenges reduced the duration and severity of the common cold	46	Urge urinary incontinence and risk of falls and fractures in older women	59
Review: prokinetics and histamine-2 receptor antagonists improve symptom scores in non-ulcer dyspepsia	47	Review: current oral contraceptive use increases the risk of stroke	60
<i>H. pylori</i> testing plus eradication v prompt endoscopy for dyspepsia	48	Quality improvement	
Review: antibiotics reduce the severity of travellers' diarrhoea	49	A nurse led clinic and computer support for anticoagulation decisions	61
Zinc increased growth more in stunted infants than non-stunted infants	50	Clinical prediction guide	
Review: anticonvulsant drugs relieve chronic pain but not acute pain	51	A decision rule identified patients with head injury who did not need computed tomography	62
		Clinical criteria that ruled out cervical spine injury in blunt trauma	63
		A simple model predicted healing of venous leg ulcers at 24 weeks	64
