

# Evidence-Based Medicine

**Editors:** Brian Haynes & Paul Glasziou

## Contents

Purpose and procedure	162
Additional articles abstracted in <i>ACP Journal Club</i>	163
EBM notebook: Which methods for bedside Bayes?	164
Resource corner	167

## Therapeutics

Wearing elastic compression stockings during long-haul flights prevented the development of deep venous thrombosis	169
No difference existed in developmental outcomes at 3 years of age between early or delayed tympanostomy for otitis media	170
Review: aspirin reduces the incidence of coronary artery disease in people at risk	171
Bucindolol reduced mortality and hospitalisation related to cardiovascular causes in advanced chronic heart failure	172
Carvedilol reduced mortality and hospitalisation in severe chronic heart failure	173
Stents had similar clinical outcomes but more repeated revascularisation than did bypass surgery in multivessel disease	174
Gemfibrozil reduced the risk for stroke in men with coronary heart disease and low concentrations of high-density lipoprotein cholesterol	175
Changes in diet and physical activity prevented type 2 diabetes mellitus in people with impaired glucose tolerance	176
Warm water bathing did not reduce use of pharmacological analgesia during the first stage of labour	177
Prenatal and postnatal administration of <i>Lactobacillus GG</i> reduced the occurrence of atopic disease in offspring	178
<i>Salmonella typhi</i> Vi conjugate vaccine reduced the incidence of typhoid fever in 2 to 5 year old children	179
Surgery was more effective than orthosis for hallux valgus	180

Review: cognitive care and combined cognitive and emotional care interventions may influence patients' health outcomes	181
A home-based, nurse-delivered exercise programme reduced falls and serious injuries in people $\geq 80$ years of age	182
Review: pharmacological and non-pharmacological interventions improve outcomes in patients with dementia and for their caregivers	183
Review: antidepressants plus benzodiazepines lead to fewer drop outs and less depression severity in major depression	184
St John's wort was no better than placebo for reducing depression scores	185
Review: oral melatonin reduces jet lag in air travellers	186

## Diagnosis

Short scales were as effective as long scales in screening for depression in older patients	187
A negative quantitative latex D-dimer assay helped to rule out venous thromboembolism	188

## Economics

<i>Helicobacter pylori</i> testing and endoscopy were less cost-effective than usual management for patients with dyspepsia	189
---	-----

## Quality improvement

Review: some interventions are effective in reducing medical errors	190
A tailored, multifaceted programme in capitation-based family practices improved appropriate use of preventive care manoeuvres	191

## Clinical prediction guide

A clinical decision aid was accurate for predicting survival to hospital discharge after in-hospital cardiac resuscitation	192
