

# Evidence-Based Medicine

**Editors:** Brian Haynes & Paul Glasziou

## Contents

Purpose and procedure	34		
Additional articles abstracted in <i>ACP Journal Club</i>	35		
EBM notebook: clinical expertise in the era of evidence-based medicine and patient choice	36		
Resource corner	39		
<b>Therapeutics</b>			
The Dietary Approaches to Stop Hypertension diet lowered systolic blood pressure in stage 1 isolated systolic hypertension	41		
Combined treatment with indapamide and perindopril but not perindopril alone reduced the risk for recurrent stroke	42		
Clopidogrel plus aspirin was effective but increased bleeding in acute coronary syndromes without ST-segment elevation	43		
A nurse-led intervention reduced risk factors, anxiety, and depression in patients waiting for CABG	44		
Revascularisation led to less angina and fewer adverse cardiac events than did optimal medical care in angina pectoris in the elderly	45		
Continuous and intermittent sibutramine were equally effective at 44 weeks for reducing weight in obesity	46		
Levodopa plus carbidopa before physiotherapy increased motor recovery after stroke	47		
Review: thrombolysis increases short term death and intracranial haemorrhage but decreases long term death or dependence	48		
Review: studies on the cardiovascular effects of selective COX-2 inhibitors show mixed results	49		
Review: long term lithium treatment lowers suicide risk in major affective disorder	50		
Review: problem solving treatment after deliberate self harm improves depression, hopelessness, and personal problems	51		
Review: behavioural interventions show the most promise for chronic fatigue syndrome	52		
		Review: mucolytic drugs reduce exacerbations, illness days, and antibiotic use in chronic bronchitis and chronic obstructive pulmonary disease	53
		Zinc or vitamin A reduced diarrhoea in young, poor Bangladeshi children	54
		A rice based diet with green banana or pectin reduced diarrhoea in infants better than a rice alone diet	55
		Physiotherapy, aerobics, and training devices reduced pain intensity and frequency in chronic low back pain	56
		Review: antidepressants improve headache in patients with chronic headache	57
		<b>Diagnosis</b>	
		Review: CT angiography and magnetic resonance imaging are the best less invasive tests for renal artery stenosis	58
		B-natriuretic peptide concentrations had high sensitivity and specificity for detecting abnormal ventricular function	59
		<b>Prognosis</b>	
		Children infected with meningitis before 1 year of age were at increased risk for disability at 5 years of age	60
		<b>Etiology</b>	
		Low level prenatal alcohol exposure was associated with adverse behavioural outcomes in children at 6 to 7 years of age	61
		<b>Quality improvement</b>	
		Review: multidisciplinary coronary heart disease management programmes improve the process of care and reduce hospital admissions	62
		<b>Economics</b>	
		An intranasal influenza vaccine for the prevention of influenza in healthy children was cost effective	63
		<b>Differential diagnosis</b>	
		A standardised sequential clinical examination identified probable causes of syncope in 69% of patients	64
