

# Evidence-Based Medicine

**Editors:** Brian Haynes & Paul Glasziou

## Contents

Purpose and procedure **66**

Additional articles abstracted in *ACP Journal Club* **67**

## EBM notebook

Practice corner: evidence-based medicine in practice **68**

Resource review **71**

## Therapeutics

Review: exercise training reduces HbA<sub>1c</sub> concentrations but not body mass in type 2 diabetes mellitus **73**

Overall satisfaction increased more with inhaled insulin than with subcutaneous insulin in type 1 diabetes **74**

Review: inactivated vaccines provide the greatest protection against influenza in healthy people **75**

Review: adding antileucotrienes to inhaled corticosteroids reduces exacerbations in symptomatic chronic asthma **76**

Montelukast moderately decreased asthma symptoms in children with persistent asthma **77**

Review: pressurised metered dose inhalers are as effective as other hand held inhalers for corticosteroid use in asthma **78**

Review: pressurised metered dose inhalers are as effective as other hand held inhalers for  $\beta_2$  agonist bronchodilator use in asthma **79**

Irbesartan was renoprotective in patients with type 2 diabetes, hypertension, and microalbuminuria **80**

Irbesartan reduced progression of nephropathy caused by type 2 diabetes independent of the effect on blood pressure **81**

Losartan was renoprotective in diabetic nephropathy independent of its effect on blood pressure **82**

A specialist nurse intervention reduced readmissions in patients admitted to hospital with chronic heart failure **83**

Benzodiazepines were as safe as and more effective than placebo for out-of-hospital status epilepticus **84**

Lansoprazole provided more effective and faster relief for heartburn than omeprazole in erosive oesophagitis **85**

Review: antidepressants increase remission and clinical improvement in bulimia nervosa **86**

Review: psychological treatment is as effective as antidepressants for bulimia nervosa, but a combination is best **87**

Review: primary care counselling improves psychological symptoms in patients with psychological and psychosocial problems **88**

Review: haloperidol does not reduce agitation in dementia **89**

Oestrogen did not prevent death or non-fatal stroke in postmenopausal women with ischaemic stroke or transient ischaemic attack **90**

Initial bromocriptine did not change mortality in early, mild Parkinson's disease **91**

Review: evidence on surgical interventions for distal radial fractures is inconclusive **92**

## Diagnosis

Review: physical diagnostic tests have low diagnostic accuracy for meniscal lesions of the knee **93**

## Aetiology

Review: breast cancer is associated with a family history of the disease in first degree relatives **94**

## Economics

1 of 2 quality improvement interventions for depression in managed care was more effective but more costly than usual care **95**

## Clinical prediction guide

Several simple rules predicted complications in high risk patients with diabetes **96**
