

# Evidence-Based Medicine

**Editors:** Brian Haynes & Paul Glasziou

Additional articles abstracted in ACP Journal Club

163

## EBM Notebook

Incorporating economic analysis into clinical practice guidelines: a guide for hopeful users

164

## Resource review

168

## Therapeutics

Nicorandil reduced coronary events in stable angina

169

Review: aerobic exercise reduces systolic and diastolic blood pressure in adults

170

Effects of hormone therapy on quality of life in postmenopausal women with CAD differed according to menopausal symptoms

171

Cardiac resynchronisation was effective for moderate to severe heart failure with intraventricular conduction delay

172

Losartan reduced cardiovascular morbidity and mortality more than atenolol in patients with diabetes and essential hypertension

173

Losartan reduced strokes and new onset diabetes more than atenolol in essential hypertension

174

Review: advice on low fat diets is not better than other weight-reducing diets for sustaining weight loss in obesity

175

Review: metformin does not increase fatal or non-fatal lactic acidosis or blood lactate concentrations in type 2 diabetes mellitus

176

Review: venlafaxine is more effective than selective serotoninreuptake inhibitors for depression

177

Review: screening for depression reduces persistent depression

178

Galantamine improved cognition and global functioning in vascular dementia or Alzheimer's disease with cerebrovascular disease

179

Review: several drugs, especially triptans, are effective for pain relief in acute migraine

180

Review: cardioselective  $\beta$ -blockers did not reduce respiratory function in patients with chronic obstructive pulmonary disease

181

Ibuprofen was more protective against asthma morbidity than acetaminophen in asthmatic children with fever

182

Oral dexamethasone improved respiratory distress in children < 2 years of age with acute bronchiolitis

183

Review: probiotics are effective in preventing antibiotic-associated diarrhoea

184

Review: *Lactobacillus* is safe and effective for treating children with acute infectious diarrhoea

185

Review: infliximab increases response and remission rates in fistulising or treatment-resistant Crohn's disease

186

Lack of evidence exists for the effectiveness of over the counter cough preparations for children with upper respiratory tract infections

187

## Diagnosis

Children's drawings of headache pain were accurate for diagnosing migraine

188

Ultrasonography plus radiography was as effective as intravenous urography for detecting abnormalities in men with proven urinary tract infection

189

## Prognosis

Review: one tenth of patients with Crohn's disease have prolonged remission

190

## Quality improvement

Delayed prescription reduced antibiotic use in the common cold

191

Review: organisational change and patient involvement may increase the use of prevention cancer screening services

192
