

Other articles noted

The purpose and procedure section in each issue of Evidence-Based Medicine describes the criteria for selecting articles for inclusion. A list of the journals we read is also printed in each issue. All articles that meet our criteria in the reviewed journals are cited in Evidence-Based Medicine, but there is not enough space to abstract them all. The following articles passed all criteria but were not abstracted. Practising clinicians have rated them for clinical relevance and newsworthiness, and the mean scores are displayed. An abbreviated version of this list appears in the printed issue. To view a sample rating form, go to: <http://hiru.mcmaster.ca/more/RatingFormSample.htm>
