

Evidence-Based Medicine

Contents

Purpose and procedure	162	Review: adults who require inhaled corticosteroids benefit from a moderate starting dose	178
Additional articles abstracted in ACP Journal Club	163	Review: rotavirus vaccines moderately reduce rotavirus diarrhoea in children	179
EBM notebook		Review: non-steroidal anti-inflammatory drugs are slightly better than paracetamol for reducing pain in osteoarthritis	180
Jottings	164	Review: most selective serotonin reuptake inhibitors lead to adverse events that appear to outweigh the benefits in children	181
Measurement scales.....	164	Non-sterile gloves were as safe as sterile gloves for repair of uncomplicated lacerations	182
Evidently	167	Primary tumour excision with a surrounding margin of 3 cm reduced recurrence in melanomas > 2 mm thick	183
Primary Care Physicians and Internal Medicine Subspecialists: become a sentinel reader	168	Oestrogen therapy increased stroke risk and decreased hip fracture risk but did not affect coronary heart disease risk in postmenopausal women with prior hysterectomy	184
Therapeutics		Diagnosis	
Review: prophylactic use of vitamin D reduces falls in older persons	169	Review: several factors are associated with the performance of D-dimer assays for detecting deep venous thrombosis	185
Review: calcium supplementation has a small positive effect on bone mineral density but not fractures in postmenopausal women	170	Review: negative ELISA results are best for excluding a diagnosis of deep venous thrombosis or pulmonary embolism	186
Review: spinal manipulative therapy is not better than standard treatments for low back pain	171	Prognosis	
Review: soluble fibre improves overall symptoms and constipation but not abdominal pain in irritable bowel syndrome	172	Men had greater risk of recurrent venous thromboembolism than women	187
Review: several non-pharmacological, pharmacological, and surgical treatments may be effective in urinary incontinence	173	Clinical prediction guide	
Review: exercise training in patients with heart failure is safe	174	A bedside prediction tool predicted all cause mortality 6 months after discharge for acute coronary syndrome	188
Review: exercise based cardiac rehabilitation reduces all cause and cardiac mortality in coronary heart disease	175	Resource Reviews	189
Review: topical mupirocin or fusidic acid may be more effective than oral antibiotics for limited non-bullous impetigo	176	Other articles noted	191
Review: limited data on dietary treatment of type 2 diabetes show that dietary advice plus exercise appears more beneficial than dietary advice alone	177	Glossary	Inside back cover

The virtual journal Paediatric Asthma, produced by the American Academy of Paediatrics and the BMJ Publishing Group, is now available free of charge to EBM subscribers at www.pediatric-asthma.org
